

The regular sections in avr - Nonwovens & Technical Textiles

Readers of the magazine find the following sections in every issue

- **News, Views & Markets**
- **Raw & Auxiliary Materials**
- **Fibers & Filaments**
- **Nonwovens & Technical Textiles**
- **Technology & Machinery**
- **Research & Development**
- **Events & Dates**

Based on the production and processing of nonwovens and technical textiles, avr reports on a wide range of topics in the individual sections. These include, among others,

Fibers & auxiliary materials

Binding agents, superabsorbent polymers, adhesives

Machine suppliers

Nonwovens production facilities, treatment lines, crosslappers, nonwoven bonding lines, nonwoven processing machines, winders and unwinders, quality assurance/maintenance, finishing, coating, printing, laminating

Manufacture of nonwovens & technical textiles

Drylaid, airlaid, spunlace, wetlaid, meltblown composites

Further processing

Geo- and construction textiles, filters, mobile textiles, wipes, hygiene/care/medicine, packaging, clothing/protection/shoes

Events & further training

Trade fairs, conferences, seminars, research institutions

In particular, avr is dedicated to the diverse fields of application for technical textiles and nonwovens and their influence on manufacturers. Every issue features specialist reports from acknowledged experts in the nonwovens and technical textiles industry, who offer the reader objective information about these areas. Market surveys serve as an informative resource. Special trend topics are also covered.
